

VANTAG

Dealer Onboarding & Training Guide

Everything you need to sell, install, and support Vantag

Version 1.0 | June 2026 | Confidential — Authorised Dealers Only

Table of Contents

Part 1	Welcome & Programme Overview
Part 2	What is Vantag — Product Knowledge
Part 3	How to Qualify & Approach Customers
Part 4	Installation Step-by-Step
Part 5	Handling Objections & Closing Sales
Part 6	Commission, Payments & Reporting
Part 7	FAQ & Escalation Contacts

PART 1 — WELCOME TO THE VANTAG DEALER PROGRAMME

Your guide to building a successful reseller business

Welcome to the Vantag Authorised Dealer Programme. As a Vantag dealer, you are joining a growing network of professionals helping retail businesses across India, Malaysia, and Singapore protect their stores and grow their profits with AI-powered security — at a price that every shop owner can afford.

Your Earning Potential

Customers Onboarded	Average Plan (INR Growth)	Monthly Commission	Annual Income
5 customers	INR 2,499/mo	INR 1,875	INR 22,500
10 customers	INR 2,499/mo	INR 3,750	INR 45,000
20 customers	INR 2,499/mo	INR 7,500	INR 90,000
50 customers	INR 2,499/mo	INR 18,750	INR 2,25,000

TIP: Commission is RECURRING — every month the customer pays, you earn. A single customer earning INR 375/month for 3 years = INR 13,500 from one sale.

What the Programme Provides You

- Authorised Dealer Certificate (physical + digital)
- Demo account with full platform access for demonstrations
- This Dealer Training Guide (PDF)
- Pricing Sheet (customisable with your contact details)
- Pitch Deck for customer presentations
- Dedicated support contact at Vantag for escalations
- Commission tracking via dealer portal (in development)
- Marketing materials: banners, brochures, social media assets

PART 2 — PRODUCT KNOWLEDGE

Know the product inside out before selling it

The Vantag Platform — In Simple Terms

Vantag is a software subscription that adds AI intelligence to existing CCTV cameras. It consists of two parts: (1) a small **Edge Agent** — a Windows app installed on any PC at the store — and (2) a **cloud dashboard** the owner accesses from any browser or phone. The AI runs on the store's own PC, so there are no expensive cloud AI bills.

AI Shelf Monitoring

Best for: Pharmacies, electronics shops, cosmetics stores, supermarkets

The camera watches the shelf 24/7. When a product is picked up, removed, or unusual activity is detected, an alert fires within seconds.

Auto Camera Discovery

Best for: All store types — especially non-technical owners

When the Edge Agent is installed, it scans the store's Wi-Fi/LAN and finds all connected cameras automatically. The owner never needs to know an IP address or RTSP path.

Zone Intelligence

Best for: Convenience stores, banks, pharmacies, jewellery shops

The owner draws a box on the camera view (e.g., 'Cash Counter', 'Entrance', 'Stockroom Door'). Any person entering or object moving in that zone triggers an alert.

Footfall Analytics

Best for: Malls, food courts, franchise chains

Counts how many people enter the store per hour, per day, per week. Shows peak times so staff can be allocated efficiently.

30-Day Incident History

Best for: All store types

All incidents are stored with a thumbnail snapshot for 30 days (Growth/Pro). Useful for insurance claims, police reports, staff disputes.

Multi-Language Dashboard

Best for: India multi-state dealers, Malaysian dealers

Available in English, Hindi, Tamil, Telugu, Kannada, Malayalam, Marathi, Gujarati, Bengali, Punjabi, Malay.

Supported Camera Brands

Hikvision	Dahua	CP Plus	TP-Link (Tapo)	Reolink	Uniview	Axis (ONVIF)	Any RTSP/ ONVIF camera
-----------	-------	---------	----------------	---------	---------	--------------	------------------------

PART 3 — QUALIFYING & APPROACHING CUSTOMERS

Who to target and what to say

Ideal Customer Profile

HIGH PRIORITY	■ Pharmacies & medical stores (1–10 staff) ■ Electronics & mobile phone shops ■ Jewellery & watch stores ■ Cosmetics & beauty stores ■ Supermarkets & grocery chains ■ Convenience stores / mini-marts
MEDIUM PRIORITY	■ Clothing & garment stores ■ Restaurants with multiple entry/exit points ■ Hostels, PGs, service apartments ■ Small offices & co-working spaces ■ Post offices, government counters
EXPANSION TARGETS	■ Franchise chains (multi-store discount) ■ Shopping malls (multi-camera, Pro plan) ■ Hospitals & clinics (security + compliance) ■ School canteens & bookshops ■ Petrol stations & convenience forecourts

The 3-Minute Opening Script

"Hi, my name is [Your Name]. I help shop owners like yourself use AI to stop theft and protect your inventory — using the cameras you already have installed.

Most CCTV systems just record. Nobody watches them until after something goes missing. Vantag makes your existing cameras smart — it alerts you the moment something unusual happens, right on your phone.

The cost is less than INR 100 per day. And most shop owners recover that cost from prevented theft in the first week. Can I show you a 3-minute demo?"

Handling Objections

Customer Objection	Your Response
<i>"I already have CCTV"</i>	Exactly! Vantag works with your existing cameras. You don't replace anything. We just make your current cameras intelligent. It's like upgrading from a basic phone to a smartphone — same hardware, 10x smarter.
<i>"It's too expensive"</i>	The Starter plan is INR 999/month — that's INR 33/day, less than a chai and snack. Most shops recover this cost from just 3–4 prevented thefts in the first month.

<i>"I need to think about it"</i>	Absolutely. In the meantime, we offer a 14-day money-back guarantee, so you risk nothing. Why not start today and cancel if it doesn't work? Most customers never cancel.
<i>"I'm not technical"</i>	You don't need to be. Installation takes 30 minutes and we handle it for you. After that, you just see alerts on your phone — no technical knowledge needed.
<i>"I'll wait for someone else to try first"</i>	Several shops in [city/area] are already using it. Would you like me to connect you with one of them so you can hear directly from them?
<i>"My internet is slow / unreliable"</i>	The AI processing happens on your own store PC — not the internet. You only need basic internet for the dashboard and alerts. Even a 4G dongle is sufficient.

PART 4 — INSTALLATION GUIDE

Step-by-step: from unboxing to live AI in 30 minutes

What You Need Before You Start

- A Windows PC or laptop at the store (Windows 10/11, any age)
- The store's Wi-Fi password or LAN access
- Cameras connected to the same network (CCTV, NVR, or IP cameras)
- The customer's Vantag account login (from their registration email)
- Your phone/laptop to access the Vantag web dashboard

1 Register the Customer

- Go to retail-vantag.com (or retailnazar.com for India)
- Click 'Register' — fill in store name, email, country, language
- Select a plan (recommend Growth for most stores)
- Complete payment via Razorpay / credit card
- Customer receives login credentials via email

2 Download & Install the Edge Agent

- Log in to the dashboard at retail-vantag.com/dashboard
- Go to Settings → Download Agent → Click 'Windows'
- Run the installer on the store's PC
- Enter the API Key shown in the dashboard when prompted
- Click 'Start Monitoring' in the system tray

3 Auto-Discover Cameras

- In the dashboard, go to Cameras → Click 'Auto-Scan'
- Wait 30–60 seconds — cameras appear automatically
- If cameras don't appear, check they are on the same Wi-Fi/LAN as the PC
- For each camera: click 'Confirm & Add', give it a name (e.g. 'Entrance Cam')
- Test the camera feed — you should see live video within 5 seconds

4 Configure Zones

- Go to Zones → Click 'Add Zone' on any camera
- Drag a rectangle over the area to monitor (shelf, entrance, counter)
- Name the zone clearly: e.g. 'Shelf A - Medicines', 'Main Entrance'
- Select alert type: Movement, Intrusion, Product Removal
- Save the zone — monitoring starts immediately

5 Test & Hand Over

- Ask the customer to physically walk through the zone / move a product
- Confirm the incident appears in the dashboard and on their phone
- Show the customer how to view incidents, filter by date/type
- Give them the support email: support@retail-vantag.com
- Collect their signature on the Dealer Agreement copy

IMPORTANT: If the camera is behind a separate NVR network (not the store's main LAN), you may need to connect the store PC to the NVR's VLAN. Ask the customer for the NVR manual or call Vantag support for remote assistance.

Common Issues & Quick Fixes

Q: Camera not found after Auto-Scan	A: Ensure camera and PC are on same Wi-Fi/LAN. Try turning camera off and on. Use 'Manual Add' in the dashboard if camera brand is known.
Q: Video feed shows but is very slow	A: Change the camera stream to Sub-stream (lower resolution) in the camera settings. Vantag works fine on sub-stream — saves bandwidth and reduces latency.
Q: Agent not connecting to dashboard	A: Check the API Key is entered correctly. Check PC internet connection. Restart the Vantag Agent from the system tray.
Q: Alerts not reaching phone	A: Ensure the customer has installed the Vantag mobile app and enabled push notifications. Check notification settings in the Vantag dashboard under Alerts.

PART 5 — COMMISSION & PAYMENTS

How you earn, how it's tracked, how it's paid

Item	Detail
Commission Rate (Installing Dealer)	15% of net subscription
Commission Rate (Referral Partner, non-installing)	10% of net subscription
Payment Frequency	Monthly, within 30 days of customer payment clearing
Minimum Payout Threshold	INR 500 / MYR 20 / SGD 10
Payment Method	Bank transfer to dealer's registered account
Chargeback / Refund	Commission forfeited if customer refunded within 30 days
Annual Plan Commission	Full 15% on annual amount received (paid as lump sum)
Tracking	Dealer portal (in development) — monthly statement via email until live

TIP: Always use the same email when introducing a customer — this is how we track your commissions. Send customer name + email + phone to support@retail-vantag.com with subject 'New Customer — [Dealer Name]' before or immediately after sign-up.

PART 6 — FAQ FOR DEALERS

Answers to the most common dealer questions

Q: Do I need technical knowledge to install?	A: Basic familiarity with Windows and Wi-Fi is enough. You don't need to be a CCTV technician. Full support is available from Vantag for the first 3 installations.
Q: Can I offer a free trial to customers?	A: Yes — use your demo account to show a live demonstration. The 14-day money-back guarantee effectively acts as a trial for new customers.
Q: What if the customer's cameras are old?	A: As long as the camera supports RTSP (most IP cameras from 2015 onwards do), Vantag works. If the camera is very old (analog, no IP), a hybrid DVR with RTSP output is needed.
Q: Can I resell across regions (e.g. India + Malaysia)?	A: Your agreement covers a specific region. To sell in multiple regions, request a multi-region addendum from support@retail-vantag.com .
Q: What if a customer wants to cancel?	A: Direct them to support@retail-vantag.com . Cancellations processed within 24 hours. Pro-rated refunds as per the T&C.; Your commission is retained for months already paid.
Q: Can I set my own installation fee?	A: Yes — your installation or onboarding fee to the customer is entirely your own charge and separate from the Vantag subscription. Many dealers charge INR 500–2,000 for installation.
Q: How do I escalate a technical issue I can't solve?	A: Email support@retail-vantag.com with subject 'DEALER ESCALATION — [Customer Name] — [Issue]'. Include the customer's registered email and a description. Response within 4 hours.

PART 7 — CONTACTS & SUPPORT

Reach the right person, every time

Contact Type	Contact	Response Time
General Support & Escalations	support@retail-vantag.com	Within 4 hours (business days)
Dealer Commission Queries	support@retail-vantag.com Subject: Commission Query	Within 2 business days
New Customer Registration	support@retail-vantag.com Subject: New Customer — [Dealer Name]	Same day
Technical Installation Help	support@retail-vantag.com Subject: DEALER ESCALATION	Within 4 hours
Dealer Agreement & Legal	support@retail-vantag.com Subject: Agreement Query	Within 3 business days
