

# VANTAG | AI ALGO

## MASTER STRATEGY PLAYBOOK & CORPORATE BLUEPRINTS (EXCHANGE RATE RECTIFIED: 1 USD = 96 INR)

---

**Core Platform:** Vantag Retail Intelligence Platform ([retailnazar.com](https://retailnazar.com) / [retailnazar.in](https://retailnazar.in))

**Parent IP Developer Hub:** AI Algo (S) Pte Ltd, Singapore

**Indian Operating Subsidiary:** BrainGuard AI Technologies Pvt. Ltd., Noida, India

**Verified Live Subscription Rates:** Starter (₹1,999) | Growth (₹4,499) | Pro (₹8,999)

**Strategic Split Framework:** 35% Parent Royalty / 20% Local Subsidiary / 20% OEM / 25% Installer

**Classification:** Commercial Confidential / Executive Board & Partner Briefing

**Version:** 6.1 (Rectified Forex Parameters)

**Date:** June 2026

# DOCUMENT 01: MASTER COMMERCIAL PARTNERSHIP MOU (TERRITORY: INDIA)

REF: BG-VNTG-MOU-2026-V6.1

**BETWEEN:**

**BrainGuard AI Technologies Private Limited**, located in Noida, Uttar Pradesh, India, acting as the authorized localized contract-execution subsidiary of **AI Algo (S) Pte Ltd, Singapore**.

**AND:**

**[INSERT HARDWARE PARTNER]**, (e.g., Vintron Informatics Ltd / Aditya Infotech - CP Plus), managing physical video surveillance pipelines across the Republic of India.

## 1. SCOPE OF PLATFORM LICENSING

This agreement applies exclusively to the published live website subscription levels of the Vantag Retail Intelligence Platform. Advanced customization solutions, *SecureWatch Pro*, *GetOmniVoice.com*, and *SmartLeadsHub.com* are explicitly excluded and remain designated as **To Be Discussed (TBD)**.

## 2. INTELLECTUAL PROPERTY & BRANDING

100% of the underlying algorithm weights and machine learning models remain the exclusive property of **AI Algo (S) Pte Ltd, Singapore**. Every software user interface and client dashboard layer must prominently display the signature trademark: **"Powered by AI Algo"** or **"Algo Engines"**.

## 3. WEBSITE-ALIGNED PRICING & SYMMETRICAL WATERFALL SPLIT

| PUBLISHED PLAN | CAMERA SUPPORT   | LIVE WEBSITE RETAIL MRP | AI ALGO SINGAPORE IP ROYALTY (35%) | BRAINGUARD NOIDA SHARE (20%) | HARDWARE OEM PARTNER SHARE (20%) | INSTALLING LOCAL DEALER CUT (25%) |
|----------------|------------------|-------------------------|------------------------------------|------------------------------|----------------------------------|-----------------------------------|
| Starter Pack   | Up to 5 Cameras  | ₹1,999 / month          | ₹699.65                            | ₹399.80                      | ₹399.80                          | ₹499.75                           |
| Growth Pack    | Up to 15 Cameras | ₹4,499 / month          | ₹1,574.65                          | ₹899.80                      | ₹899.80                          | ₹1,124.75                         |
| Pro Pack       | Up to 30 Cameras | ₹8,999 / month          | ₹3,149.65                          | ₹1,799.80                    | ₹1,799.80                        | ₹2,249.75                         |

## 4. PRE-PAID ACTIVATION TOKEN WALLET

Fulfillment occurs digitally via pre-paid package tokens managed on the Vantag Dashboard portal. The Hardware Partner purchases token allocations in upfront quarterly blocks from BrainGuard AI.

# DOCUMENT 02: GLOBAL MULTI-REGION STRATEGY & CAPITALIZATION BRIEF

TARGET AUDIENCE: AI ALGO SINGAPORE BOARD & STAKEHOLDERS

---

## 1. GLOBAL ASSET ISOLATION MANDATE

Singapore acts as an asset-light technology export hub, licensing software access blocks to localized operating subsidiaries (like BrainGuard India) via secure token-validation architectures, completely insulating the master IP from localized tax collection audits or field liabilities.

## 2. TRI-REGIONAL VERIFICATION & COST RECTIFICATION (1 USD = 96 INR)

Our platform economics are exceptionally healthy because heavy video analysis runs locally on edge computers (no per-frame cloud AI costs). Based on a true market exchange rate of **₹96 per USD**, our master infrastructure costs remain perfectly contained:

- **Starter Net Profit:** AI Algo Singapore's top-line 35% share is ₹699.65. Subtracting total cloud expenses (₹113.10, which includes the localized ₹73.12 server base plus the ₹39.98 Razorpay transaction gateway cut), the parent entity clears a pure net profit of **₹586.55 per tenant/month**, yielding an **83.83% net profit margin** on its share.
- **Growth Net Profit:** Singapore's 35% share is ₹1,574.65. Subtracting total rectified cloud expenses (₹163.10, factoring in the ₹89.98 gateway transaction slice), the net profit scales to **₹1,411.55 per month** (an 89.64% margin).

## 3. HORIZON 2 EXPANSION ROADMAP

**The Middle East Blueprint:** GCC nations enforce severe data residency guidelines (e.g., Dubai's SIRA regulations). Vantag's Edge architecture—storing all footage locally and passing only lightweight metadata alerts—is the perfect technological answer. We will bypass entry plans in the GCC, anchoring via tier-1 integrators at premium rates: Starter at **AED 149/mo**, Growth at **AED 299/mo**, and Pro at **AED 599/mo**.

# DOCUMENT 03: LOCAL EXECUTION & CHANNEL SECURITY MANDATE

TARGET AUDIENCE: BRAINGUARD AI DIRECTORS & NOIDA OPERATIONS

---

## 1. ENFORCING THE 35 / 20 / 20 / 25 SPLIT AND DASHBOARD TRANSPARENCY

To eliminate dealer resistance, the dashboard portal must hardcode and display the dealer's specific 25% cut transparently on their interface screens (e.g., locking exactly ₹499.75 directly to the installer on every Starter Pack). BrainGuard Noida retains exactly ₹399.80 on Starter, ₹899.80 on Growth, and ₹1,799.80 on Pro to fully self-fund office space, sales infrastructure, and upcoming localized India data center clusters.

## 2. HARDCODED TECHNICAL RISK CONTROLS

- **WhatsApp Notification Cap:** Third-party WhatsApp messaging costs run at ~₹0.42 per text. The codebase will enforce a strict cap of **30 WhatsApp messages per month** across standard packages. Standard notifications process via Firebase mobile push notifications for free. Crossing the cap requires a premium token.
- **Resolution Constraints for Incident Thumbnails:** The local Edge software will compress all event thumbnails to a maximum resolution of **400x300 pixels (JPEG format)** before uploading to the cloud server, safely keeping data storage within our 150MB per tenant/month projection.
