

VANTAG | AI ALGO

MASTER STRATEGY PLAYBOOK & CORPORATE BLUEPRINTS (LIVE WEB-PUBLISHED PRICING ALIGNMENT)

Core Platform: Vantag Retail Intelligence Platform (retailnazar.com / retailnazar.in)

Parent Developer IP Node: AI Algo (S) Pte Ltd, Singapore

Indian Contract Execution Subsidiary: BrainGuard AI Technologies Pvt. Ltd., Noida, India

Verified Live Subscription Rates: Starter (₹1,999) | Growth (₹4,499) | Pro (₹8,999)

Strategic Split Framework: 35% Parent Royalty / 20% Local Subsidiary / 20% OEM / 25% Installer

Classification: Commercial Confidential / Board & Partner Executive Review

Version: 6.0 (Comprehensive Price & Target Margin Overhaul)

Date: June 2026

DOCUMENT 01: MASTER COMMERCIAL PARTNERSHIP MOU (TERRITORY: INDIA)

REF: BG-VNTG-MOU-2026-V6

BETWEEN:

BrainGuard AI Technologies Private Limited, located in Noida, Uttar Pradesh, India (hereinafter referred to as "**BrainGuard AI**"), acting as the authorized localized contract-execution, operational deployment, and invoicing subsidiary of **AI Algo (S) Pte Ltd, Singapore** (the ultimate Intellectual Property Developer).

AND:

[**INSERT HARDWARE PARTNER**], (e.g., Vintron Informatics Ltd / Aditya Infotech - CP Plus), an engineering, assembly, and sales distribution corporation managing physical video surveillance pipelines across the Republic of India (hereinafter referred to as the "**Hardware Partner**").

1. SCOPE OF PLATFORM LICENSING & CAPABILITY MATRIX

This framework governs the licensing, tokenization, and distribution rules of the **Vantag Retail Intelligence Platform** (operating via *retailnazar.com* and *retailnazar.in*). Vantag operates via an Edge AI client executing object detection locally on store processing computers, thereby bypassing per-frame cloud AI computing charges.

Strict Platform Scoping: This agreement applies exclusively to the published live website subscription levels. High-value enterprise customized engineering solutions, *SecureWatch Pro*, *GetOmniVoice.com*, and *SmartLeadsHub.com* are explicitly excluded from these parameters, designated as **To Be Discussed (TBD)** under separate corporate schedules.

2. INTELLECTUAL PROPERTY SOVEREIGN PROTECTION & BRANDING MANDATE

The Hardware Partner explicitly recognizes that 100% of the underlying algorithm weights, machine learning datasets, model architectures, code repositories, and software updates remain the exclusive property of **AI Algo (S) Pte Ltd, Singapore**. No technology ownership is transferred locally. Every software dashboard interface, mobile alert layer, analytical summary, and marketing asset deployed must prominently display the co-branding trademark: "**Powered by AI Algo**" or "**Algo Engines**".

3. WEBSITE-ALIGNED PRICING & 35 / 20 / 20 / 25 WATERFALL SPLIT

To preserve market integrity, prevent channel cross-cannibalization, and honor live consumer commitments, all billing tranches align with the verified website packages. To secure standalone localized self-funding and maximize installer traction, a hardcoded ****65% Combined Channel Margin Pool**** is structured out of the retail list price, leaving a clean 35% core technology transfer rate for the parent company:

PUBLISHED PLAN	CAMERA SUPPORT	LIVE WEBSITE RETAIL MRP	AI ALGO SINGAPORE IP ROYALTY (35%)	BRAINGUARD NOIDA SHARE (20%)	HARDWARE OEM PARTNER SHARE (20%)	INSTALLING LOCAL DEALER CUT (25%)
Starter Pack	Up to 5 Cameras	₹1,999 / month	₹699.65	₹399.80	₹399.80	₹499.75
Growth Pack	Up to 15 Cameras	₹4,499 / month	₹1,574.65	₹899.80	₹899.80	₹1,124.75
Pro Pack	Up to 30 Cameras	₹8,999 / month	₹3,149.65	₹1,799.80	₹1,799.80	₹2,249.75

*Note: In accordance with live web specifications, annual plans are billed upfront at a 17% savings tier, equivalent to exactly 10 months of recurring list price (Starter: ₹19,990/yr | Growth: ₹44,990/yr | Pro: ₹89,990/yr).

4. PRE-PAID ACTIVATION TOKEN INFRASTRUCTURE

Fulfillment occurs digitally via pre-paid package tokens managed on the Vantag Dashboard. The Hardware Partner purchases block allocations of package tokens matching their target tiers from BrainGuard AI upfront. Tokens are drawn down to zero as field dealers connect client stores. No active production edge node is provisioned without a pre-funded token balance inside the wallet.

5. OPERATIONAL DEMARCATION & FIELD LIABILITY

The Hardware Partner retains 100% legal, component, and operational liability for physical site routing, camera positioning, hardware warranties, local network configurations, and Bureau of Indian Standards (BIS) compliance. BrainGuard AI is strictly liable for Tier-3 remote software updates and patch support. This agreement is strictly non-exclusive.

DOCUMENT 02: GLOBAL MULTI-REGION STRATEGY & CAPITALIZATION BRIEF

TARGET AUDIENCE: AI ALGO SINGAPORE BOARD & STAKEHOLDERS

1. GLOBAL CORPORATE ISOLATION & IP PROTECTION MANDATE

The fundamental directive of **AI Algo (S) Pte Ltd, Singapore**, is the total insulation of our primary algorithmic asset code from direct localized liabilities, regional tax compliance burdens, and field-level support tracking. Singapore operates purely as an asset-light technology export hub, licensing structured application pipelines to regional execution centers and joint ventures via secure API gateways and edge agent token frameworks.

2. TRI-REGIONAL VERIFICATION & MARKET ALIGNMENT

Our current international operational nodes track local currency baselines, locking in our core software transfer values cleanly based on live web specifications:

- **India Territory (The Volume Node via BrainGuard AI):** Following live website updates to **₹1,999 (Starter) / ₹4,499 (Growth) / ₹8,999 (Pro)**, our core hardware capability expands dramatically (supporting up to 5, 15, and 30 concurrent cameras per box). This high camera density provides a massive competitive upgrade. Singapore locks a 35% top-line royalty, while BrainGuard Noida holds a robust 20% operational fee.
- **Malaysia Territory (Strategic Channel Alignment):** Managed via localized networks (e.g., *jagajaga.my*) aligned with standard list packages: Starter at **MYR 79/mo**, Growth at **MYR 149/mo**, and Pro at **MYR 299/mo**.
- **Singapore Hub (Premium Enterprise Direct Sandbox):** Managed directly out of our corporate hub at top-tier commercial rates: Starter at **SGD 29/mo**, Growth at **SGD 59/mo**, and Pro at **SGD 99/mo**.

3. NET EARNINGS, CLOUD YIELDS & COST MITIGATION ANALYSIS

Vantag's baseline platform economics are exceptionally healthy because it functions via ****Edge AI Processing****, meaning all heavy video analysis runs locally on the store computer with zero per-frame cloud overhead. Standard Hostinger cloud infrastructure costs are trivial: a base Hostinger VPS KVM2 costs ~\$9/month and handles ~30 tenants comfortably, resulting in a core server cost of roughly **~₹81.00 per customer tenant/month**.

- **Starter Net Profit:** AI Algo Singapore's top-line 35% share is ₹699.65. Subtracting total cloud expenses (₹81.00), the parent entity clears a net profit of **₹618.65 per tenant/month**, yielding an exceptional ****88.4% net profit margin**** on its incoming share.
- **Growth Net Profit:** Singapore's share is ₹1,574.65. Subtracting variable costs (₹100.00, accounting for a larger 2% Razorpay India gateway transaction slice), the net profit scales to **₹1,474.65 per month**.
- **The Low-Volume Buffer:** The 35% rate represents our absolute floor at Tier 1 volume. When partners operate at lower volume tiers, they pay a higher token rate. BrainGuard Noida holds its flat 20% cut constant, meaning any unearned OEM leftover margin automatically defaults back to Singapore, expanding our early-stage cash flows to up to **50% of top-line revenue**.

4. HORIZON 2 EXPANSION ROADMAP: GCC & ASEAN CORRIDOR

I. The Middle East Blueprint (UAE & Saudi Arabia - Vision 2030)

The Gulf Cooperation Council (GCC) geographic zone represents our highest-ARPU horizon vector. Middle Eastern nations enforce exceptionally strict data residency and local data sovereignty laws (such as Dubai's SIRA surveillance mandates and Saudi Arabia's NCA guidelines). Conventional Western SaaS competitors face major regulatory hurdles because their models require continuous streaming of heavy raw video files to public cloud centers outside the region.

Our Technological Edge: Vantag's core USP—"Runs entirely on your local on-premise store PC with zero cloud AI cost"—is the definitive answer to Middle Eastern data residency compliance. Video data never leaves the physical building; only lightweight, anonymized metadata alerts cross the local boundary. We will completely bypass entry-level pricing in the GCC, anchoring the market at a premium baseline (e.g., Starter at **AED 149/mo**, Growth at **AED 299/mo**, and Pro at **AED 599/mo**) distributed exclusively through elite, tier-1 system integrators in Dubai and Riyadh.

II. The ASEAN Framework (Hong Kong, Vietnam, Philippines)

- **Hong Kong Gateway:** Targeting major commercial property managers and premium mall infrastructure portfolios. Focus on deploying *SecureWatch Pro* for spatial traffic flow and safety monitoring.
- **Vietnam Smart Factories:** Aligning with electronics assembly line setups and warehouse hubs where edge execution avoids local data-transfer bandwidth limits.
- **Philippines Retail Distribution:** Partnering with distributed commercial grocery groups via Vantag, while introducing *GetOmniVoice.com* to tier-1 call center networks.

DOCUMENT 03: LOCAL EXECUTION & CHANNEL SECURITY MANDATE

TARGET AUDIENCE: BRAINGUARD AI DIRECTORS & NOIDA OPERATIONS

1. OBJECTIVE & REVENUE SECURITY MANDATE

This operational blueprint outlines the ground execution framework for the leadership and management partners at **BrainGuard AI Technologies Pvt. Ltd., Noida**. The core mandate is to secure mass deployment across the Indian commercial surveillance market, onboard 1,000+ active security dealers, and ensure flawless technical delivery while maintaining clean financial accounting.

2. ENFORCING THE PREPAID TOKEN WALLET AND DASHBOARD TRANSPARENCY

The team must strictly reject any requests for postpaid billing or credit windows. No production camera node will go live until the partner has drawn down an active pre-paid token block.

To completely protect local installing dealers from OEM margin-hoarding, our dashboard portal must hardcode and display the dealer's specific 25% cut transparently on their interface screens:

- For every Starter Pack activated at the website price of ₹1,999, the dashboard locks exactly **₹499.75 (25%)** directly to the verified local installer. The OEM partner cannot modify or obscure this incentive.
- **BrainGuard Noida Operational War Chest (20%):** BrainGuard retains exactly ****₹399.80** on Starter, **₹899.80** on Growth, and **₹1,799.80** on Pro**. This robust revenue slice is explicitly ring-fenced to fund local office rentals, pay our B2B sales teams to motivate OEM reps, and prepare BrainGuard to absorb 100% of localized cloud data center costs (such as AWS/GCP India clusters) as routing transitions domestically.

3. HARDCODED TECHNICAL RISK CONTROLS (PREVENTING MARGIN BLEED)

1. **WhatsApp Notification Cap:** Third-party WhatsApp API messaging costs run at ~₹0.42 per text. If a customer store triggers numerous security event notifications, they can easily burn through hundreds of messages, creating massive margin leakage. The codebase will enforce a strict cap of ****30 WhatsApp messages per month**** across standard packages. Standard notifications process via Google Firebase mobile push notifications for free. Beyond the 30-message cap, the system requires a premium add-on token.
2. **Resolution Constraints for Incident Thumbnails:** To ensure data storage stays within our ****150MB per tenant/month**** projection, the local Vantag Edge Agent software program will forcibly downscale and compress all event thumbnails to a maximum resolution of **400x300 pixels (JPEG format)** before uploading to the cloud server, protecting our Hostinger VPS nodes from storage bloat.

DOCUMENT 04: TOKEN SOURCING STRATEGY & WHOLESALE PRICING MATRIX

STANDALONE FINANCIAL GOVERNANCE SHEET

This governance matrix defines the wholesale sourcing costs for pre-paid digital activation tokens under the verified **35 / 20 / 20 / 25 global margin structure**. Hardware partners buy token tranches upfront, and their purchase price drops strictly based on active network thresholds:

A. Starter Pack Token Scales (Published Website MRP: ₹1,999 / month)

VOLUME TIER	ACTIVE CONCURRENT STREAMS	OEM TOKEN SOURCING PRICE	OEM MARGIN (INR)	DEALER MARGIN (25%)	BRAINGUARD NOIDA (20%)	AI ALGO SINGAPORE YIELD
Tier 4 (Standard)	1 – 999 streams	₹1,399.30	5% (₹99.95)	₹499.75	₹399.80	₹999.50 (50.0%)
Tier 3 (Silver)	1,000 – 4,999 streams	₹1,299.35	10% (₹199.90)	₹499.75	₹399.80	₹899.55 (45.0%)
Tier 2 (Gold)	5,000 – 24,999 streams	₹1,199.40	15% (₹299.85)	₹499.75	₹399.80	₹799.60 (40.0%)
Tier 1 (OEM Elite)	25,000+ streams	₹1,099.45	20% (₹399.80)	₹499.75	₹399.80	₹699.65 (35.0%)

B. Growth Pack Token Scales (Published Website MRP: ₹4,499 / month)

VOLUME TIER	ACTIVE CONCURRENT STREAMS	OEM TOKEN SOURCING PRICE	OEM MARGIN (INR)	DEALER MARGIN (25%)	BRAINGUARD NOIDA (20%)	AI ALGO SINGAPORE YIELD
Tier 4 (Standard)	1 – 999 streams	₹3,149.30	5% (₹224.95)	₹1,124.75	₹899.80	₹2,249.50 (50.0%)
Tier 3 (Silver)	1,000 – 4,999 streams	₹2,924.35	10% (₹449.90)	₹1,124.75	₹899.80	₹2,024.55 (45.0%)
Tier 2 (Gold)	5,000 – 24,999 streams	₹2,699.40	15% (₹674.85)	₹1,124.75	₹899.80	₹1,799.60 (40.0%)
Tier 1 (OEM Elite)	25,000+ streams	₹2,474.45	20% (₹899.80)	₹1,124.75	₹899.80	₹1,574.65 (35.0%)

C. Pro Pack Token Scales (Published Website MRP: ₹8,999 / month)

VOLUME TIER	ACTIVE CONCURRENT STREAMS	OEM TOKEN SOURCING PRICE	OEM MARGIN (INR)	DEALER MARGIN (25%)	BRAINGUARD NOIDA (20%)	AI ALGO SINGAPORE YIELD
Tier 4 (Standard)	1 – 999 streams	₹6,299.30	5% (₹449.95)	₹2,249.75	₹1,799.80	₹4,299.50 (50.0%)
Tier 3 (Silver)	1,000 – 4,999 streams	₹5,849.35	10% (₹899.90)	₹2,249.75	₹1,799.80	₹3,849.55 (45.0%)
Tier 2 (Gold)	5,000 – 24,999 streams	₹5,399.40	15% (₹1,349.85)	₹2,249.75	₹1,799.80	₹3,399.60 (40.0%)
Tier 1 (OEM Elite)	25,000+ streams	₹4,949.45	20% (₹1,799.80)	₹2,249.75	₹1,799.80	₹3,149.65 (35.0%)
