STANDALONE DOCUMENT: TOKEN SOURCING STRATEGY & FINANCIAL POLICY MATRIX

Document Authority: This standalone corporate policy blueprint defines the functional mechanics, wholesale transfer pricing schedules, and multi-tier margin distribution matrices governing pre-paid digital activation tokens. All figures are mathematically anchored to the verified 2026 live website subscription packages of the **Vantag Retail Intelligence Platform** (operating via *retailnazar.com* and *retailnazar.in*).

1. TECHNICAL CONCEPT & TOKEN VALUE-CHAIN MECHANICS

To preserve complete top-line yield transparency and insulate our operating subsidiaries from collection delays or bad debts within the Indian territory, software fulfillment is hardcoded via an upfront digital token infrastructure. A single **Activation Token** represents an immutable software license key authorizing exactly thirty (30) days of active edge computer vision stream parsing on a single client node.

The commercial value chain ensures absolute protection for all stakeholders by managing fund splits through the following automated distribution levels:

```
[End-User Website MRP] -> minus 25% Installer Cut = [Dealer Sourcing Cost from OEM]
[Dealer Sourcing Cost] -> minus OEM Vol-Tier Cut = [OEM Sourcing Cost from BrainGuard]
[OEM Sourcing Cost] -> Split: 20% Flat to BrainGuard Noida / 35%+ Leftover to Singapore Hub
```

- **Protected Field Installer Annuity (25% constant):** To eliminate dealer resistance and accelerate ground-level sales velocity, the local installing security installer/dealer always retains a flat 25% of the retail sticker price, hardcoded directly onto their dashboard interface screen.
- **BrainGuard Noida Operational Fee (20% constant):** BrainGuard India automatically holds a flat 20% of the top-line retail price. This allocation is ring-fenced to secure standalone localized self-funding for office space, local B2B sales teams, and upcoming domestic cloud infrastructure nodes.

2. COMPREHENSIVE SOURCING PRICE MATRICES (ALL TIERS)

The wholesale transfer price per token drops strictly as the Hardware OEM Partner's (e.g., Vintron / CP Plus) active stream network scales across India. When the OEM operates at lower volume tiers, any unearned margin automatically moves up the chain as an unencumbered cash bonus to ****AI Algo Singapore****, expanding the parent group's early-stage cushions.

Plan A: Starter Pack Token Matrix (Published Web MRP: ₹1,999 / month)

Inclusions: Up to 5 concurrent camera edge streams, zone alerts, 7-day incident history panel.

VOLUME TIER	ACTIVE CONCURRENT STREAMS	OEM TOKEN SOURCING COST	OEM CORPORATE PROFIT	INSTALLING DEALER CUT (25%)	BRAINGUARD NOIDA CUT (20%)	AI ALGO SINGAPORE YIELD
Tier 4 (Standard)	1 – 999 streams	₹1,399.30	5% (₹99.95)	₹499.75	₹399.80	₹999.50 (50.0%)
Tier 3 (Silver)	1,000 – 4,999 streams	₹1,299.35	10% (₹199.90)	₹499.75	₹399.80	₹899.55 (45.0%)
Tier 2 (Gold)	5,000 – 24,999 streams	₹1,199.40	15% (₹299.85)	₹499.75	₹399.80	₹799.60 (40.0%)
Tier 1 (OEM Elite)	25,000+ streams	₹1,099.45	20% (₹399.80)	₹499.75	₹399.80	₹699.65 (35.0%)

Plan B: Growth Pack Token Matrix (Published Web MRP: ₹4,499 / month)

Inclusions: Up to 15 concurrent camera edge streams, auto camera discovery, heatmaps, 30-day history.

VOLUME TIER	ACTIVE CONCURRENT STREAMS	OEM TOKEN SOURCING COST	OEM CORPORATE PROFIT	INSTALLING DEALER CUT (25%)	BRAINGUARD NOIDA CUT (20%)	AI ALGO SINGAPORE YIELD
Tier 4 (Standard)	1 – 999 streams	₹3,149.30	5% (₹224.95)	₹1,124.75	₹899.80	₹2,249.50 (50.0%)
Tier 3 (Silver)	1,000 – 4,999 streams	₹2,924.35	10% (₹449.90)	₹1,124.75	₹899.80	₹2,024.55 (45.0%)
Tier 2 (Gold)	5,000 – 24,999 streams	₹2,699.40	15% (₹674.85)	₹1,124.75	₹899.80	₹1,799.60 (40.0%)
Tier 1 (OEM Elite)	25,000+ streams	₹2,474.45	20% (₹899.80)	₹1,124.75	₹899.80	₹1,574.65 (35.0%)

Plan C: Pro Pack Token Matrix (Published Web MRP: ₹8,999 / month)

Inclusions: Up to 30 concurrent camera edge streams, 90-day history panel, API access, white-label UI dashboard.

VOLUME TIER	ACTIVE CONCURRENT STREAMS	OEM TOKEN SOURCING COST	OEM CORPORATE PROFIT	INSTALLING DEALER CUT (25%)	BRAINGUARD NOIDA CUT (20%)	AI ALGO SINGAPORE YIELD
Tier 4 (Standard)	1 – 999 streams	₹6,299.30	5% (₹449.95)	₹2,249.75	₹1,799.80	₹4,299.50 (50.0%)
Tier 3 (Silver)	1,000 – 4,999 streams	₹5,849.35	10% (₹899.90)	₹2,249.75	₹1,799.80	₹3,849.55 (45.0%)
Tier 2 (Gold)	5,000 – 24,999 streams	₹5,399.40	15% (₹1,349.85)	₹2,249.75	₹1,799.80	₹3,399.60 (40.0%)
Tier 1 (OEM Elite)	25,000+ streams	₹4,949.45	20% (₹1,799.80)	₹2,249.75	₹1,799.80	₹3,149.65 (35.0%)

3. DASHBOARD PROCESSING MECHANICS & REVENUE RECONCILIATION

The automated platform ecosystem manages token billing across two separate transactional tracks:

- **Tranche Sourcing (The Master B2B Channel):** The OEM places an order to increase their dashboard master wallet balance. The portal checks their trailing 30-day active streaming count, locks them into their corresponding volume tier, and issues a unified proforma invoice. Upon payment clearance by BrainGuard Noida, the digital activation keys are provisioned instantly into the OEM's master wallet.
- **Dynamic Split Gateway (The Direct-Web Route):** If an end-user client checks out directly on the website using an installer's custom QR link or code, our integrated Razorpay split API automatically divides the payment at the moment of authorization: 25% maps to the dealer's bank node, 20% credits the OEM's portal balance, 20% lands in BrainGuard's operating pool, and 35% streams instantly to AI Algo Singapore as an IP software export royalty.

Governance Clause: This standalone token pricing structure is restricted to standard Vantag platform levels. All parallel standalone product tracks—including custom multi-store enterprise modifications, *SecureWatch Pro*, *GetOmniVoice.com*, and *SmartLeadsHub.com*—are strictly excluded and undergo independent licensing evaluations.
