

Vantag — JagaJaga

Pengawal AI untuk Kedai Anda • AI Guardian for Your Shop

AI-POWERED • EDGE-FIRST • PLUG & PLAY

12 AI detection types | works with ANY IP camera | setup in 30 min

The Retail Problem — Solved

Retail shrinkage costs Malaysia's shopkeepers a staggering 1.5–3% of revenue every year. Traditional CCTV only records — it doesn't alert, doesn't prevent, and nobody watches it.

JagaJaga turns your existing cameras into a 24/7 AI guardian that catches theft, fall-hazards, empty shelves and staff fraud — *before* they cost you money.

Why shopkeepers choose us

- Plug-and-play: set up in under 30 minutes from a phone.
- Works with ANY IP camera — no vendor lock-in, no new hardware cost.
- AI runs on a local Edge device — your video never leaves the shop.
- One-tap door lock via MQTT the instant a threat is detected.
- Real-time alerts on mobile + web, with video evidence attached.
- Built-in POS & email integrations — no coding required.
- Bilingual UI — English + your local language, switchable anytime.
- Starts at just one monthly subscription — no long contracts.

12 AI Detections Running Simultaneously

Every camera in your shop is analyzed 24/7 by 12 specialized AI models running on-site. No cloud upload. No video leaves your premises.

● Product Sweeping Detection Catches shoplifters grabbing multiple items in seconds.	● Anomalous Dwell Time Flags loiterers lingering near high-value shelves.
● Empty Shelf Detection Tells staff exactly when to restock — before customers leave.	● Theft & Concealment Spots items slipped into bags, pockets, or clothing.
● Inventory Movement Tracking Knows which SKU moved, how many, and when.	● Fall Detection Alerts you instantly if a staff member or customer falls.
● Zone Entry Violations Stops unauthorized entry to stock-rooms & back offices.	● Crowd / Queue Analytics Sees long queues — open another counter automatically.
● Camera Tamper Detection Knows the moment a lens is blocked, sprayed, or rotated.	● Staff Behavior Monitoring Till fraud, phone use, prolonged absence — all logged.
● After-Hours Intrusion Zero tolerance for movement when the shop is closed.	● License Plate Capture Capture every car at drive-through lanes or car parks.

How It Works — 3 Steps

STEP 1 Register & Pay Enter shop details, pick a plan, pay securely via Razorpay. 3 minutes.	STEP 2 Scan QR → Install Agent Install the Edge Agent on any Android phone, tablet, or Windows PC. Scan the QR to pair.	STEP 3 Cameras auto-detected System scans your LAN, finds every IP camera, and starts AI in under 30 minutes.
