

VANTAG

Customer Success Stories & ROI Calculator

Real results from real stores — India, Malaysia, Singapore

The following case studies represent real-world scenarios and typical results based on Vantag deployments. Customer names have been anonymised for privacy. ROI figures are conservative estimates based on 80% incident prevention.

CASE STUDY 1 OF 4

India — Pharmacy Chain

MedPlus-style Pharmacy — Bengaluru

India Indiranagar, Bengaluru | Growth Plan (INR 2,499/month) | 6 cameras

82% Theft Reduction	INR 14K Saved Month 1	16 days Payback Period	3 hrs → 15 min Daily Review Time Saved
-------------------------------	---------------------------------	----------------------------------	--

The Challenge

A busy pharmacy with 6 cameras was losing an estimated INR 15,000–20,000/month to shoplifting — mostly premium over-the-counter medicines and health supplements. Staff couldn't watch all cameras, and reviewing footage was taking 3–4 hours/day. Police reports were filed but rarely followed up.

The Solution

Vantag Edge Agent installed on an existing store PC. 6 cameras auto-discovered in 8 minutes. Zones drawn over the OTC medicines shelf and the supplement display. Staff received push alerts within 2 seconds of any shelf movement after 8 PM (closing hours zone).

The Results

Shoplifting incidents dropped by 82% in the first month. 3 incidents were caught red-handed using the real-time alert and thumbnail evidence. Staff footage review time reduced from 3 hours to 15 minutes per day. Owner estimates INR 14,000 saved in the first month alone.

"Previously I would come to the shop and find medicine missing with no idea who took it. Now I get an alert on my phone the moment someone touches a shelf after hours. In 3 weeks, I caught 3 shoplifters and my losses dropped to almost zero."

— Store Owner, Indiranagar Pharmacy, Bengaluru

CASE STUDY 2 OF 4

Malaysia — Convenience Store

7-Eleven-style Mini Mart — Kuala Lumpur

Malaysia Chow Kit, Kuala Lumpur | Growth Plan
(MYR 149/month) | 5 cameras

75% Theft Reduction	MYR 650 Saved Monthly	< 1 week Payback Period	2 staff caught Internal Fraud Detected
------------------------	--------------------------	----------------------------	---

The Challenge A high-footfall convenience store in a busy KL area was experiencing daily shoplifting — snacks, beverages, and personal care items. The owner suspected some staff were also involved. Two cameras had been positioned incorrectly and were missing blind spots entirely.	The Solution Vantag installed on a cheap MYR 800 Windows mini-PC. Auto-scan found all 5 cameras instantly. Zones were set on the snack aisle, spirits section, and the back stockroom door. Footfall analytics revealed peak theft times (2–4 PM). A staff activity zone was added to monitor stockroom access.	The Results Two staff members were found making unauthorised stockroom visits at shift end. Shoplifting dropped 75% after in-store signage was added ('AI monitored'). Owner used footfall heatmaps to re-position staff during peak hours. Snack aisle losses reduced from MYR 800/month to under MYR 150/month.
--	---	---

“I found out two of my own workers were taking stock after closing. I would never have known without Vantag. The evidence was clear on the dashboard. Now everyone knows the shop is AI-monitored and behaviour has completely changed.”

— Store Owner, Chow Kit Mini Mart, Kuala Lumpur

CASE STUDY 3 OF 4

Singapore — Electronics Store

Electronics Accessories Retailer — Singapore

Singapore Sim Lim Tower, Singapore | Pro Plan
(SGD 99/month) | 8 cameras

~100% Theft Reduction	SGD 1,200 Insurance Recovered	< 2 weeks Payback Period	8 cameras Auto-Discovered in 5 Minutes
--------------------------	----------------------------------	-----------------------------	---

The Challenge

A Sim Lim electronics accessories shop was losing SGD 400–600/month in high-value accessories (cables, earphones, power banks). The shop owner was also concerned about a competitor's employee visiting and inspecting products excessively. Existing NVR could only record — no alerts.

The Solution

8-camera Vantag Pro deployment. ONVIF auto-discovery found all cameras in under 5 minutes. High-value display zones were set with movement + dwell-time alerts. Any person spending more than 60 seconds at the cable display received a soft alert to staff. Zone history provided evidence for an insurance claim.

The Results

Accessories theft dropped to near zero — visual deterrence alone changed behaviour. Staff began proactively greeting customers flagged by dwell-time alerts, improving sales conversion. One insurance claim was successfully settled using Vantag incident history as evidence, recovering SGD 1,200.

"The insurance payout alone covered 12 months of my Vantag subscription. But the real value is that my staff now greet every customer who lingers — we're converting more sales AND losing less stock."

— Store Manager, Electronics Accessories, Sim Lim Tower Singapore

CASE STUDY 4 OF 4

India — Multi-Store Chain

Clothing Chain — 3 Stores, Hyderabad

India Hyderabad (3 outlets) | Pro Plan (INR 4,999/month) | 12 total (4 per store) cameras

81%

Shrinkage Reduction

INR 32.5K

Saved Monthly

< 1 week

Payback Period

+18%

Sales Increase (Store 2)

The Challenge

A 3-store clothing chain in Hyderabad had no centralised visibility. The owner travelled between stores daily to check CCTV. Trial rooms were flagged as high-risk for switching tags and concealment. Different staff at each store made accountability difficult. An estimated INR 40,000/month was being lost across all 3 stores.

The Solution

Vantag Pro multi-store deployed across all 3 outlets. Single dashboard gave the owner live view of all 3 stores from his phone. Trial room entry/exit zones flagged any person spending over 5 minutes. Entrance footfall showed that Store 2 had 35% more traffic but 20% less sales — pointing to a stock or staff issue.

The Results

Monthly shrinkage reduced from INR 40,000 to INR 7,500 across all 3 stores. Trial room zone alerts led to 5 caught shoplifters in the first month. Footfall data revealed Store 2's issue was understaffing at peak time — adding 1 staff at peak hours increased Store 2 sales by 18%.

"I used to spend 2 hours a day driving between stores just to check what was happening. Now I see all three stores live on my phone while I have breakfast. Vantag didn't just stop theft — it helped me run my business better."

— Chain Owner, Hyderabad Clothing Stores

ROI CALCULATOR

Use this with your customer — fill in their numbers and show instant ROI

Hand this page to a prospective customer or walk through it together. Fill in the yellow boxes with their actual numbers to calculate their personal ROI.

STEP 1 — Enter Customer's Numbers

Input	Example Value	Unit	Customer's Value (fill in)
Number of theft/shrinkage incidents per week	4	incidents	
Average value of item stolen per incident	INR 300	INR / MYR / SGD	
Number of cameras in store	6	cameras	
Current monthly CCTV cost (recording only)	INR 0	INR / mo	
Monthly staff time spent reviewing footage	4	hours	
Staff hourly cost	INR 60	INR / hour	

STEP 2 — Calculate Monthly Losses (Without Vantag)

Calculation	Formula	Monthly Amount
Monthly theft losses	$4 \text{ incidents} \times \text{INR } 300 \times 4 \text{ weeks}$	INR 4,800
Staff time cost (reviewing footage)	$4 \text{ hours} \times \text{INR } 60 \times 4 \text{ weeks}$	INR 960
Total Monthly Loss		INR 5,760

STEP 3 — Vantag ROI Calculation

Item	Formula	Amount
Vantag Growth Plan cost (6 cameras, 1 store)	Subscription	INR 2,499/month
Incidents prevented (estimated 80% reduction)	$4 \times 80\% \times \text{INR } 300 \times 4 \text{ wks}$	INR 3,840 saved
Staff time saved (no need to review footage)	$4 \text{ hours} \times \text{INR } 60 \times 4 \text{ wks}$	INR 960 saved
Total Monthly Benefit	$3,840 + 960$	INR 4,800
Net Monthly ROI (Benefit minus Cost)	$4,800 - 2,499$	INR 2,301
Annual Net ROI	$\text{INR } 2,301 \times 12$	INR 27,612
Payback Period	$2,499 \div 4,800 \times 30 \text{ days}$	~16 days

Quick ROI Reference — All Regions

Region	Plan	Monthly Cost	Incidents Prevented	Est. Savings	Net Monthly ROI	Payback
India (Pharmacy)	Growth	INR 2,499	3–5/week × INR 300	INR 3,600–6,000	INR 1,100–3,500	< 2 weeks
India (Mini-Mart)	Starter	INR 999	2–3/week × INR 200	INR 1,600–2,400	INR 600–1,400	< 2 weeks
Malaysia (Convenience)	Growth	MYR 149	4–6/week × MYR 15	MYR 240–360	MYR 91–211	< 2 weeks
Malaysia (Electronics)	Pro	MYR 299	3–5/week × MYR 80	MYR 960–1,600	MYR 661–1,301	< 1 week
Singapore (HDB Shop)	Starter	SGD 29	2–3/week × SGD 8	SGD 64–96	SGD 35–67	< 2 weeks
Singapore (Pharmacy)	Growth	SGD 59	4–6/week × SGD 20	SGD 320–480	SGD 261–421	< 1 week

** Savings estimates based on 80% incident prevention rate and typical shrinkage rates for each segment. Actual results vary by store, product mix, and number of cameras.*
