

MASTER B2B SOFTWARE DISTRIBUTION AGREEMENT

REGIONAL VALUE-ADDED CHANNEL CONTRACT

DOCUMENT REFERENCE: BGX-VINTRON-DIST-2026-V9.1

EFFECTIVE DATE: 15 June 2026

CONTRACT VALIDITY: Thirty-Six (36) Months Fixed Term (Continuous)

BY AND BETWEEN:

BRAINGUARDX AI TECHNOLOGIES PRIVATE LIMITED, a corporation organized and existing under the laws of India, having its corporate and registered operational office located at Noida, Uttar Pradesh, India (hereinafter referred to as the "**Company**"), which expression shall, unless repugnant to the context or meaning thereof, include its corporate successors and permitted assigns, acting as the authorized localized operational, contract-execution, and distribution subsidiary of **AI Algo (S) Pte Ltd, Singapore**;

AND:

VINTRON INFORMATICS LIMITED, a public limited corporation organized and existing under the laws of India, having its electronic manufacturing facilities and corporate headquarters located at Okhla, New Delhi, India (hereinafter referred to as the "**Distributor**"), which expression shall, unless repugnant to the context or meaning thereof, include its successors and permitted assigns.

The Company and the Distributor may collectively be referred to as the "**Parties**" and individually as a "**Party**."

PREAMBLE

WHEREAS, the Company is the authorized localized operating subsidiary and exclusive pipeline channel within the Republic of India for advanced proprietary software suites, convolutional neural network architectures, computer vision modules, and analytics engines engineered by its parent developer entity, AI Algo (S) Pte Ltd, Singapore (hereinafter referred to as the "**Principal IP Holder**");

WHEREAS, the Distributor maintains a mature national electronic manufacturing infrastructure, an established enterprise customer base, and an active value-added distribution channel network composed of over 1,000 security dealers and system integrators across India;

WHEREAS, the Distributor desires to acquire a non-exclusive right to distribute prepaid digital software activation licenses to its channel network, and the Company is willing to

grant such rights subject to strict adherence to the intellectual property, compliance, financial, and liability guardrails defined herein;

NOW, THEREFORE, in consideration of the mutual covenants, terms, conditions, and cash considerations contained herein, the Parties agree as follows:

SECTION 1: DEFINITIONS & LEGAL INTERLINKING

- **"Activation Token" (or "SaaS Token")** means an immutable, unique digital authorization license key provisioned via the Vantag Partner Dashboard that authorizes exactly thirty (30) calendar days of active software processing for a single camera stream or user node.
- **"Ecosystem Product Suites"** means the specific proprietary software models distributed under this contract, restricted to:
 1. *RetailNazar (Vantag Retail Analytics Layer)*: Edge AI local computer vision engines.
 2. *SecureWatch Pro*: Enterprise spatial crowd tracking and threat mitigation security software.
 3. *GetOmniVoice*: Multimodal voice analytics AI contact center platform.
 4. *SmartLeadsHub*: Data compilation and predictive lead enrichment analytics engine.
- **"Master MoU Interlinking"** means that this Commercial Agreement is executed concurrently with, and acts as an inseparable operational addendum to, the *Master Memorandum of Understanding (Ref: BG-VNTG-MOU-2026-V7.5)*. Any material breach, volume tier regression, or systemic non-compliance under this contract automatically voids the strategic entitlements granted within the Master MoU.

SECTION 2: INTELLECTUAL PROPERTY SOVEREIGN PROVISIONS & BRANDING BOUNDARIES

2.1 Retention of Global Title

The Distributor explicitly recognizes, covenants, and agrees that 100% of the underlying algorithm weights, source repositories, database architectures, machine learning models, model training datasets, and engineering updates behind all Ecosystem Product Suites are, and shall at all times remain, the exclusive and uncompromised property of the Principal IP Holder (**AI Algo (S) Pte Ltd, Singapore**). No transfer of ownership, title, copyright, patent access, or core technology asset code occurs under this localized Indian channel agreement.

2.2 Authorized Joint Labelling & Market Bounds

The Company grants the Distributor a limited, non-assignable, revocable license to employ a customized **Joint Label identity** (specifically restricted to the style of: "*Vintron Retail Intelligence*" or "*Vintron AI Powered by Algo Engines*") across software user interfaces and localized marketing channels. This branding grant is strictly limited by the following market boundaries:

- **Channel Restriction:** The Joint Label identity shall be utilized **strictly for volume box distribution**, manufacturing assembly bundles, and legacy hardware retrofit activations executed direct through Vintron's authorized sub-dealer network.
- **Corporate Tender Segregation:** High-tier direct enterprise deployments, national smart city bidding infrastructures, national banking/hypermarket corporate contracts, or parallel alternative OEM partnerships executed independently by the Company remain under the standalone global corporate identity of "**Powered by AI Algo**" or "**Algo Engines**".

SECTION 3: COMMERCIAL INFRASTRUCTURE & WHOLESALE TRANSFER PRICING

3.1 Upfront Prepaid Token Wallet Mechanics

To completely protect the Company and the Principal IP Holder from ground-level credit chasers, trailing consumption metering disputes, or local bad debts within India, software fulfillment operates strictly on an **Upfront Prepaid Basis**. No camera stream or user node shall be granted a live production cloud configuration until the Distributor has successfully funded their dashboard balance and drawn down an active Activation Token block.

3.2 Symmetrical Channel Revenue and Sourcing Price Matrix

The Distributor's wholesale token procurement costs from the Company are tied strictly to the published standard Maximum Retail Prices (MRP) live on the web portal. To incentivize high-volume market execution while completely shielding the Company's internal Singapore corporate royalties from external channel observation, the commercial structure tracks the following explicit wholesale values (calibrated to a stabilized baseline rate of **1 USD = 96 INR**):

Plan A: RetailNazar Sourcing Scales (Published Retail Price: ₹1,999 / month)

- **Published Consumer Standard List MRP:** ₹1,999 / month
- **Hardcoded Sub-Dealer / Field Installer Cut:** 25% Fixed constant (₹499.75)
- **Volume Sourcing Grids (Remitted to BrainGuard India):**

Volume Sourcing Tier	Active Network Footprint (Streams / Month)	Vintron Token Cost (From BrainGuard)	Vintron Corporate Profit Margin	Hardcoded Local Dealer Cut (25%)
Tier 4 (Standard Baseline)	1 – 999 active streams	₹1,399.30	5% of MRP (₹99.95)	25% of MRP (₹499.75)
Tier 3 (Silver Scaler)	1,000 – 4,999 active streams	₹1,299.35	10% of MRP (₹199.90)	25% of MRP (₹499.75)
Tier 2 (Gold Volume)	5,000 – 24,999 active streams	₹1,199.40	15% of MRP (₹299.85)	25% of Retail (₹499.75)
Tier 1 (Elite Scale)	25,000+ active streams	₹1,099.45	20% of MRP (₹399.80)	25% of Retail (₹499.75)

(Sourcing values shown illustrate the ₹1,999 Starter package; equivalent 20% OEM and 25% Dealer ratios apply to Growth Pack [₹4,499/mo] and Pro Pack [₹8,999/mo] plans symmetrically. All calculations are governed by automated dashboard routines).

Plan B: SecureWatch Pro Tiers

- **Standard Consumer Stream List Price:** ₹2,999 / month per stream
- **Elite Tier-1 Sourcing Rate:** Vintron sources tokens at a wholesale transfer cost of **₹1,649.45 / token**, securing a clean **₹599.80 corporate profit** per active stream, with the field installer retaining their hardcoded 25% cut (₹749.75).

Plan C: Strategic Referral Track (GetOmniVoice & SmartLeadsHub)

Because voice processing platforms and predictive lead validation applications function completely independently of camera hardware distribution pipelines, the Distributor acts as a premium **Strategic Referral Partner** for these applications.

- The Distributor introduces qualified enterprise accounts direct to the Company's corporate sales division.
- Upon successful onboarding and billing clearance, the Distributor secures a flat **20% referral commission** calculated against the life of the recurring monthly or annual contract value. All implementation, software provisioning, and support liabilities are managed 100% by the Company, leaving the Distributor entirely free of delivery execution risk.

SECTION 4: SYSTEM OPTIMIZATION & RESOURCE CONSTRAINTS (ANTI-BLEED SAFEGUARDS)

To secure national network stability, shield cloud database frameworks from unexpected processing latency, and maintain firm operating margins across all regions, the software layer applies two automated resource constraints:

4.1 Automated WhatsApp Messaging Ceiling

Every package tier natively includes unlimited mobile push notification alerts driven through the integrated Firebase architecture free of charge. To mitigate third-party API gateway messaging fee leakage (~₹0.42 per text alert), automated *WhatsApp* alerts are optimized at a strict cap of **30 messages per user / month**. End-users can seamlessly activate premium add-on alert token tranches directly on their dashboard screen to extend this limit.

4.2 Incident Snapshot Resolution Tuning

To protect cloud VPS storage environments from data storage bloat, the local Edge AI client software program will automatically downscale and compress all event thumbnail images to a maximum cap of **400x300 pixels (JPEG format)** before gateway transmission. Heavy high-definition raw video clips remain stored entirely on the local computer storage setup, completely protecting the master infrastructure from server bloat.

SECTION 5: EXTRAORDINARY REGULATORY FIREWALL & DATA PRIVACY INDEMNIFICATION

5.1 Data Sovereignty & Government Mandates

The Distributor explicitly covenants that it shall ensure, and takes 100% sole operational responsibility for ensuring, that all field installations executed by its system integrators fully comply with all local, state, and central government regulations within the Republic of India. This includes all **MeitY (Ministry of Electronics and Information Technology) guidelines**, local public surveillance acts, and Ministry of Home Affairs rules.

5.2 The Digital Personal Data Protection Act (DPDPA) Absolute Indemnification

Since the Ecosystem Product Suites function via local on-site processing where the physical computer owners control camera target fields, analytics logs, and stored thumbnail archives, the Distributor acts as the primary Data Processor or Fiduciary in the territory.

- The Distributor shall ensure that all end-users display prominent public signage and capture valid consumer consents as dictated by the **Digital Personal Data Protection Act (DPDPA)**.
- The Distributor hereby agrees to **fully defend, indemnify, and hold completely harmless** BrainGuardX AI Private Limited, its parent entity AI Algo (S) Pte Ltd (Singapore), their directors, and developers from any civil fines, government penalties, regulatory audits, legal damages, or third-party litigation stemming from unauthorized facial matching, unlawful target monitoring, or data privacy leaks at customer store sites.

SECTION 6: TECHNICAL SUPPORT BOUNDARIES & ESCALATION ARCHITECTURE

To keep the Company's internal software engineering assets lean and focused entirely on algorithmic code optimization, a strict operational separation is enforced on all customer service levels:

- **Tier 1 Support (Field Edge):** Physical camera tracking, cable routing, network switch disruptions, local router port forwarding issues, local computer operating system crashes, and basic customer account password resets are **100% the exclusive operational, legal, and warranty responsibility of the Distributor and their dealer network**.
- **Tier 2 Support (Configuration Systems):** Remote device configurations, edge encoding errors, and connection mismatches are handled by the Distributor's central support helpdesk, with back-end guidance from Company Certified Engineers.
- **Tier 3 Support (Core Software Engines):** Major computer vision false-positive spikes, backend database optimizations, and core algorithm codebase bugs are handled directly by Company DevOps.

SECTION 7: RECIPROCAL "GIVE AND TAKE" HARDWARE SOURCING AGREEMENT

- **Preferred Sourcing Vector:** The Company designates the Distributor as a *Preferred Sourcing Partner* for physical security cameras, network recording units, and on-site computing hardware blocks required for direct enterprise contracts executed by the Company inside India.
- **Wholesale Manufacturing Cost Sheets:** The Distributor commits to supplying the Company with its Master System Integrator physical hardware pricing sheets,

representing the absolute lowest wholesale manufacturing cost scales available in the market.

- **Physical Liability Segregation:** The Distributor retains 100% legal, component, and performance warranty liability for all physical electronic hardware deployed, including maintaining valid **BIS (Bureau of Indian Standards) certifications**.

SECTION 8: AUTOMATED VOLUME AUDITS, TERMINATION, & JURISDICTION

8.1 Automated Quarterly Volume Recalibration

At the close of each trailing quarter, the Company's automated dashboard reads the Distributor's total active field concurrently running streams. If the Distributor's stream count drops below their current milestone threshold, the platform automatically updates their token procurement cost to the corresponding higher pricing tier in the subsequent quarter.

8.2 Fixed Term Lock-In & Termination

This contract holds a fixed, binding duration of **thirty-six (36) months** from the date of final signature. Early termination without cause by either entity is strictly prohibited.

8.3 Governing Law & Jurisdiction

This contract, and the interlinked Master MoU, shall be governed by and interpreted in accordance with the laws of the Republic of India. Any unresolved disputes, commercial disagreements, or arbitration requirements shall be filed exclusively within the competent courts of New Delhi, India.

IN WITNESS WHEREOF, the authorized corporate officers of both entities sign this agreement below, executing a binding commercial framework across the territory of India.
