

VANTAG | INTELLIGENCE

STRATEGIC DISTRIBUTION PLAYBOOK & CHANNEL COMMERCIAL POLICY MATRIX

Document Purpose: This commercial blueprint defines the functional mechanics, wholesale purchasing advantages, and multi-tier revenue structures governing pre-paid digital activation tokens for the **Vantag Retail Intelligence Platform** (operating via *retailnazar.com* and *retailnazar.in*). This framework is specifically engineered to maximize channel profitability and reward high-volume business velocity across the national network.

1. THE POWER OF VANTAG: EDGE AI ARCHITECTURE & PRE-PAID SCALE

Vantag stands as an industry disruptor due to its advanced ****Edge AI Architecture****. Unlike traditional surveillance platforms that require expensive, unmetered cloud video streaming, Vantag executes heavy computer vision processing directly on the customer's on-site store PC. This technical breakthrough allows us to offer enterprise-grade retail intelligence at incredibly aggressive, fixed consumer price points with **zero cloud AI compute bills**.

The Token Economy: Instant Activation, Infinite Scalability

To eliminate billing friction and create a clean transaction flow, customer configurations are managed via pre-paid digital ****Activation Tokens****.

- A single ****Activation Token**** represents a digital license key validating exactly thirty (30) days of active edge computer vision stream operations for a client storefront.
- Partners purchase token blocks in advance tranches, moving from low-margin hardware box sales into high-margin, recurring digital assets.
- Tokens are seamlessly allocated from master wallets to sub-dealer accounts on the Vantag Partner Dashboard as installations roll out.

2. UNLOCKING HYPER-GROWTH: THE 3-TIER CHANNEL WATERFALL

Traditional physical security hardware models feature cutthroat, single-digit margins on physical boxes where you battle aggressive price compression. The Vantag ecosystem introduces a high-yield, monthly recurring revenue model designed to build a highly valuable passive annuity portfolio for your business.

We have hardcoded a massive ****Combined Channel Margin Pool**** right into the platform. This pool ensures that as network volumes grow, procurement costs drop significantly, allowing distributors and field installers to capture an unprecedented share of the retail sticker price.

A. The Field Installer Annuity (Protected 25% Cut)

To drive aggressive ground-level velocity, local installing security dealers and system integrators (SIs) are granted a ****fixed 25% cut of the retail Maximum Retail Price (MRP)****, hardcoded right into their dashboard UI. This protected structure creates an immediate incentive for field teams to actively promote, connect, and retain local storefront accounts.

B. The Volume-Tiered Wholesale Sourcing Advantage

For core distribution and OEM alignment, procurement costs drop strictly as your cumulative active camera stream footprint scales across the territory. This means as your team aggressively grows your network, your margins expand dynamically:

Plan A: Starter Pack Sourcing Scales (Published Retail Price: ₹1,999 / month)

Inclusions: Up to 5 concurrent camera edge streams, AI detection suite, zone alerts, 7-day history.

VOLUME SOURCING TIER	ACTIVE NETWORK FOOTPRINT (STREAMS / MONTH)	WHOLESALE TOKEN PURCHASE COST	EFFECTIVE PARTNER DISTRIBUTION PROFIT	PROTECTED FIELD DEALER CUT (25%)
Tier 4 (Standard Base)	1 – 999 active streams	₹1,399.30	5% of MRP (₹99.95)	25% of MRP (₹499.75)
Tier 3 (Silver Scaler)	1,000 – 4,999 active streams	₹1,299.35	10% of MRP (₹199.90)	25% of MRP (₹499.75)
Tier 2 (Gold Volume)	5,000 – 24,999 active streams	₹1,199.40	15% of MRP (₹299.85)	25% of Retail (₹499.75)
Tier 1 (Elite Partner)	25,000+ active streams	₹1,099.45	20% of MRP (₹399.80)	25% of Retail (₹499.75)

Plan B: Growth Pack Sourcing Scales (Published Retail Price: ₹4,499 / month)

Inclusions: Up to 15 concurrent camera edge streams, auto camera discovery, heatmaps, 30-day history.

VOLUME SOURCING TIER	ACTIVE NETWORK FOOTPRINT (STREAMS / MONTH)	WHOLESALE TOKEN PURCHASE COST	EFFECTIVE PARTNER DISTRIBUTION PROFIT	PROTECTED FIELD DEALER CUT (25%)
Tier 4 (Standard Base)	1 – 999 active streams	₹3,149.30	5% of MRP (₹224.95)	25% of MRP (₹1,124.75)
Tier 1 (Elite Partner)	25,000+ active streams	₹2,474.45	20% of MRP (₹899.80)	25% of MRP (₹1,124.75)

Plan C: Pro Pack Sourcing Scales (Published Retail Price: ₹8,999 / month)

Inclusions: Up to 30 concurrent camera edge streams, 90-day history panel, API webhooks, white-label UI.

VOLUME SOURCING TIER	ACTIVE NETWORK FOOTPRINT (STREAMS / MONTH)	WHOLESALE TOKEN PURCHASE COST	EFFECTIVE PARTNER DISTRIBUTION PROFIT	PROTECTED FIELD DEALER CUT (25%)
Tier 4 (Standard Base)	1 – 999 active streams	₹6,299.30	5% of MRP (₹449.95)	25% of MRP (₹2,249.75)
Tier 1 (Elite Partner)	25,000+ active streams	₹4,949.45	20% of MRP (₹1,799.80)	25% of MRP (₹2,249.75)

3. MODELING THE EARNING POTENTIAL: EXPONENTIAL SCALE

Because subscriptions operate on a predictable monthly recurring revenue (MRR) engine, capturing a high volume of business results in immediate, compound financial gains.

Symmetrical Projections at National Target Scale (Tier 1 Volume): When your distribution network successfully drives mass deployment across multiple retail segments (pharmacies, fashion showrooms, grocery chains), reaching the 25,000-stream milestone unlocks exceptional top-line numbers:

- **25,000 Active Starter Streams:** Gross monthly channel collections reach ₹4,99,75,000. Your master distribution arm captures a pure corporate profit block of **₹99,95,000.00 every single month**, while your local network of field installers takes home a collective **₹1,24,93,750.00 in monthly recurring income**.
- **25,000 Active Growth Streams:** Gross monthly channel collections scale to ₹11,24,75,000. Your master distribution corporate profit leaps to a massive **₹2,24,95,000.00 per month**, establishing a dominant financial footprint in the regional market.

4. MULTI-TENANT PROCESSING TRACKS

The Vantag partner engine automates these tiers through two clean, friction-free transactional routes to accommodate different styles of business procurement:

1. **Master Tranche Sourcing (Offline B2B):** Partners purchase block allocations of digital activation keys upfront. The portal dynamically audits your active field presence, confirms your maximum eligible volume discount tier, and provisions the keys instantly into your master dashboard balance to be pushed out to your sub-dealer networks.
2. **Dynamic Split Gateway (Direct-Web Route):** If an end-user customer completes an online credit card checkout directly on the web portal via a dealer's custom QR link or code, our integrated payment processing gateway automatically divides the payment at the moment of authorization. The system immediately pushes **25% to the installing dealer's bank account** and **20% instantly to your corporate wallet balance**, completely eliminating credit collection delays or manual bookkeeping.

Operational Policy: Authorized Distribution Governance Document — Vantag Retail Intelligence Platform. All prices are subject to standard national tax specifications where applicable. Standalone software platform tracks are subject to independent corporate schedules.
